

Leadership Summit at IIM Raipur from today

Raipur, Sep 22:

IIM Raipur will be hosting a two day 'Leadership Summit', on 23rd and 24th September 2017 at GEC Auditorium, GEC Campus, Raipur. The theme of the event is 'Leadership & Socio-Economic Prosperity'. The event will be marked by the presence of more than 25 dignitaries and industry stalwarts. These bigwigs will share their ideas on how Leadership affects socio economic prosperity.

With the Chinese economy creaking and the western countries beset with a host of socio-economic issues, India is set to assume its place as the global engine of growth. Not only is the economy booming but there's a profound optimism and electricity in the air. We are set to take off. Or so it seems. Unfortunately, looking beyond this glitter and light brings us face to face with deep

structural issues. Top 1% of India's population controls more than 58% of its wealth. Just a casual drive through any of our cities is enough to remind us of the divide between the haves and the have-nots.

The summit will provide an insight into how we should groom our managers to not just deliver profits, but sustainable and equitable growth. The collusion of the corporate stalwarts and potential leaders will discuss the possibility and the potential of equitable and sustainable growth.

The seasoned corporate honchos will sensitize the future leaders on how to deal with the trade-off between profits and socio-economic prosperity. The platform will focus on ensuring that the new generation of managers have the right parameters to gauge their success. The summit will focus on the diverse challenges India faces as it rises to make its tryst with destiny.
