

Health awareness campaign organised at village Guma

Raipur, Sep 26:

The students of Indian Institute of Management Raipur took a day out to spread awareness about health and hygiene practices among the rural population of Raipur. The Guma village has been adopted under Prayaas – the flagship marathon event of IIM Raipur.

The students of the institution paid visit to the Guma 1 village located in Arang Tehsil of Raipur and conducted an educative session on health and sanitation. It was followed by talks on maintaining personal hygiene and sanitation. Studies show that the usage of existing toilets in rural areas is very low

and people usually prefer to litter in open spaces. This poses a threat to the environment and has extreme negative impacts. Therefore, the students educated the rural folks on maintaining clean surroundings and create a better environment that supports a healthy lifestyle. The students were accompanied by the city's best doctors who gave informative lectures on health and hygiene. A medical checkup by Nirogyam hospital and Dental checkup by Government Dental College were also organized. Medical and utility products like ORS were distributed for free at the end of the event to 230 Families.
