Introduction (Programme)

"ChatGPT will not replace you. However, people with expertise in ChatGPT use will replace you."

The rise of generative artificial intelligence (AI) with models like Dall-E 2, GPT3, and ChatGPT has been a watershed moment for AI's adoption. The world has seen the popularity of this emerging new technology to the extent that within five days of release, ChatGPT crossed 1 million users. By the two-month mark, it surpassed 100 million users. These large language and image models significantly advance generative AI's capabilities, allowing them to generate human-like text and images, and such models have already started becoming a disruptor in every walk of life. Particularly, the advent of these large models has opened up a wide range of new possibilities for businesses across different industries, and the education sector. In business, Conversational AI models like ChatGPT can be used for automating repetitive tasks, improving decision-making, and creating new revenue streams. It can also be used for new product designs, optimize pricing strategies, and personalize customer experiences in retail.

ChatGPT has also the potential to transform the educational landscape by providing personalized learning experiences, enhancing accessibility, and empowering educators with innovative tools for instruction.

This program seeks to provide inputs on the topics of:
