

Management Development Program On **Financial Risk Management** **21-23 October 2025**

Program Director
Dr. Pranith Kumar Roy

Indian Institute of Management Raipur

Introduction (Program)

The rising complexity and value increase of financial instruments and their derivatives highlight the need to manage investments in these assets responsibly and effectively. To do so, professionals in financial institutions and corporations must thoroughly grasp financial risk assessment and management.

This training aims to familiarize participants with the different risk management tools available. Options, futures, swaps, and credit derivatives are covered. In addition to examining the price of these products and hedging concepts, the course would introduce specific complicated instruments, such as options on futures and swaps, among others.

The training program is aimed at assisting participants:

- Understand the function of financial risk management in both financial and non-financial businesses and the methodologies available for assessing it.
- Examine the range of financial instruments accessible in today's financial markets and the techniques a business or person might use to optimize risk management.
- Create a framework to integrate financial risk management into an overall business strategy.
